The faculty has developed a unique methodical school of teaching Russian as a foreign language: in just 10 months of study, you can learn a language at the level (B1), which allows you to study at the main faculties of the University in the same group with native speakers. According to the results of training, there is the possibility of obtaining a state certificate of proficiency in Russian.

The University has more than 70 main educational programs in foreign languages. For the students who have chosen to study in a foreign language, various short-term programs in the Russian language are offered as additional courses during the school year and summer school programs.

RUDN graduates have the opportunity to get the second specialty with a separate diploma of interpreter.
